1. Letter from the Directors

Date: _____

To

Dr. S. Ramalinga Reddy, Ph.D., D.Sc., M.I.S.T.E., M.I.E.

Director

Aditya College of Engineering

Valasapalle (P.O.), Madanapalle – 517325

Subject: Proposal for a 4-Year Structured Training & Placement Programme under a Memorandum of Understanding (MoU)

Respected Sir,

Greetings from LARE IT Cloud Solutions.

It is our privilege to present this proposal for a 4-Year Structured Training & Placement Programme in partnership with Aditya College of Engineering — a sustained, year-on-year engagement that runs alongside your academic calendar from the first year through to final placement, across every branch.

While mandatory internships address a specific curriculum requirement, we have observed that students benefit far more when personality development, technical grounding, placement readiness, and industry exposure are built progressively over four years rather than compressed into a single internship window. This programme is designed on that principle.

The programme is structured branch-wise and semester-wise — CSE and allied branches in the odd semester, core branches in the even semester — with content calibrated to each branch's starting point, and a common thread of aptitude, communication, and placement preparation running through all four years.

A defining feature of this programme is its placement pipeline: outstanding students are considered for a structured internship and Pre-Placement Offer track with our placement partner, Lare Consulting and Technologies Pvt. Ltd., in addition to placement-oriented training aligned with leading IT services recruiters.

We would be glad to walk your team through the complete year-wise structure, the tracking and certification mechanism, and the placement pipeline in person, and to work with you to finalise a programme that fits Aditya College of Engineering's academic calendar and student profile.

We sincerely appreciate your consideration and look forward to building a long-term partnership with Aditya College of Engineering.

Yours sincerely,

Sameer Shaik

Director of AI Strategy & Technology

Mobile: +91 9652879470 | Email: shaik.sameer@lareitcloudsolutions.com

Babu Kottacheruvu

Director – Software Engineering, Operations & Business Development

Mobile: +91 90144 87604 | Email: shaik.kbabu@lareitcloudsolutions.com

LARE IT Cloud Solutions

2. Executive Summary

Curricula, however well designed, rarely keep pace with the tools, frameworks, and workplace expectations of a fast-moving technology industry. Employers consistently value practical project experience, communication ability, and placement readiness at least as highly as academic performance.

LARE IT Cloud Solutions proposes a 4-Year Structured Training & Placement Programme that builds students holistically across their entire engineering journey — from personality and communication foundations in Year 1, through technical grounding and stream discovery in Year 2, placement readiness and specialisation in Year 3, to industry-grade capstone projects and placement conversion in Year 4.

Training is delivered on a rotational, branch-wise basis aligned to the academic calendar — CSE and allied branches in the odd semester, core branches (ECE, EEE, Civil, Mechanical, and others) in the even semester, with domain-relevant tracks for each. Progress is tracked through a Learning Management System (LMS), with year-wise certification tied to defined assessment criteria.

The programme culminates in a genuine placement pipeline: top-performing students are considered for a structured internship and Pre-Placement Offer track with our placement partner, Lare Consulting and Technologies Pvt. Ltd., alongside placement-oriented training aligned with TCS, Infosys, Wipro, Cognizant, and Accenture recruitment patterns.

At a Glance

Parameter	Details
Programme Name	4-Year Structured Training & Placement Programme
Partner Institution	Aditya College of Engineering, Madanapalle
Coverage	All branches, all four academic years
Scheduling	Odd Semester — CSE & Allied; Even Semester — Core Branches (1 week/branch, rotational)
Tracking	LMS-based attendance, assessment, and skill scorecard, year-wise certification
Placement Pipeline	Structured internship/PPO track with Lare Consulting and Technologies Pvt. Ltd.
Programme Fee	₹1,750 per student, per academic year (charged separately for each of the four one-year sections)

3. Programme Overview & Branch-wise Scheduling

This programme runs alongside the regular academic calendar for all branches, from the first year through to final placement, and is designed to build the student holistically — personality, technical depth, placement readiness, and industry exposure — year on year.

Branch-wise Scheduling

Training is delivered on a rotational, one-week-per-branch basis, scheduled to align with the odd and even semesters so that no single semester is overloaded:

Semester	Branches Covered	Scheduling Approach
Odd Semester	CSE & Allied Branches (CSE, CSE-AI, CSE-AIML, CSE-AIDS/AIMD)	1 week per branch, rotational. Content can lean more technical even in Year 1, since these branches already have coding exposure.
Even Semester	Core Branches (ECE, EEE, Civil, Mechanical, etc.)	1 week per branch, rotational. Domain-relevant tracks replace pure CS tracks.

Domain-Relevant Tracks for Core Branches

- ECE / EEE — Embedded systems, IoT, basic Python for automation, VLSI-adjacent software tools
- Civil / Mechanical — CAD-adjacent software, basic data analysis (Excel/Python for engineers), project management tools
- Common to all branches — Aptitude and competitive exam preparation (TCS NQT and similar), resume building, and LinkedIn optimisation modules

4. Year 1 — Foundation & Personality Building

Goal: Build confidence, communication, and value systems before the technical workload begins.

- Personality Development — self-awareness, goal setting, time management, emotional intelligence
- Universal Human Values (UHV) — ethics, self-exploration, harmony with self, family, society, and nature
- Communication Skills — verbal and non-verbal communication, active listening, business email and writing basics
- Stage Exposure & Confidence Building — JAM sessions, extempore, storytelling, public speaking
- Leadership & Teamwork — group discussions, event coordination, peer mentoring roles
- Digital & Academic Literacy — computer literacy, MS Office/Google Workspace, note-taking, exam strategy
- A light introduction to logical thinking — puzzles and reasoning games

Outcome Check

Every student can introduce themselves confidently, speak for two minutes unprepared, and work effectively within a team.

5. Year 2 — Technical Foundation & Stream Discovery

Goal: Build core programming and problem-solving muscle, then guide an informed stream choice.

1. One core programming language (Python or Java/C) — fundamentals first
2. Logic building & DSA basics — arrays, strings, recursion, basic data structures
3. Competitive Programming / Aptitude — quantitative, logical, and verbal reasoning, plus coding platforms
4. Database fundamentals — SQL, normalisation, basic DBMS concepts
5. Git/GitHub basics
6. Stream exposure through short modules — AI/ML, Data Science, Web Development, Cybersecurity, Cloud
7. Stream selection — via aptitude assessment, interest survey, and mentor counselling at the end of Year 2

Outcome Check

Every student exits Year 2 with a solid grounding in DSA, proficiency in one programming language, and an informed, counselled choice of specialisation stream.

6. Year 3 — Placement Readiness & Stream Specialisation

Goal: Build depth in the chosen stream alongside real exam and interview readiness.

- Company-specific exam patterns — TCS NQT, Infosys, Wipro, Cognizant, Accenture, and relevant product-based company OA patterns
- Advanced stream training, based on the Year 2 stream selection — deeper AI/ML, Data Science, Web Development, and related tracks
- Mock technical interviews — one-on-one and panel style, with structured feedback loops
- HR interview preparation — behavioural questions and the STAR method
- Resume building — ATS-friendly, stream-specific versions
- LinkedIn & Naukri optimisation — profile strength, keywords, recommendations
- Group discussions and case studies
- Personal branding — GitHub portfolio, LinkedIn posts, participation certificates

Outcome Check

Every student exits Year 3 with a job-ready resume, optimised professional profiles, and experience clearing two to three mock interview rounds.

7. Year 4 — Industry Readiness & Capstone Projects

Goal: Build real-world development capability and drive placement conversion.

- Full stack exposure — frontend, backend, API design (REST basics), database connectivity
- An end-to-end capstone project aligned with the student's selected stream
- Industry practices — Agile/Scrum basics, version-control collaboration, code review culture
- Deployment basics — hosting, basic cloud platforms (AWS/Azure free tier), CI/CD awareness
- Hackathons and demo days — students present projects to an industry panel
- Internships and Pre-Placement Offers — top performers routed to partner companies
- Industry mentor sessions — guest lectures from working professionals in each stream

Outcome Check

Every student exits Year 4 with a deployable project in their portfolio, and top performers enter a genuine internship/PPO pipeline.

8. Placement Partners & Internship/PPO Pipeline

Placement Partners

- Anchor / Parent Company — Lare Consulting and Technologies Pvt. Ltd., offering a guaranteed internship/PPO pipeline for top-performing students
- IT Services Tier — placement-oriented training aligned to TCS, Infosys, Wipro, Cognizant, and Accenture recruitment patterns

Internship / PPO Pipeline — Lare Consulting and Technologies Pvt. Ltd.

- Eligibility criteria — for example, top 10–15% of students by LMS score, combined with mock interview performance and project quality
- Selection process — an internal technical round followed by an HR round, both conducted by Lare
- Duration — an indicative 6–8 week internship in Year 4, during the pre-final or final semester
- Conversion criteria — defined internship performance benchmarks that determine conversion to a Pre-Placement Offer
- Recommended enhancement — a stipend and certificate clause, together with a dedicated company mentor assigned during the internship, which also strengthens NAAC/NBA accreditation documentation

Exact eligibility percentages, stipend amounts, and conversion benchmarks will be finalised jointly with the Institution prior to the first cohort entering Year 4, and recorded in writing as an addendum to this MoU.

9. Tracking Mechanism & Assessment/Certification Criteria

Learning Management System (LMS) Tracking

- Attendance and module completion tracker, maintained per year and per branch
- Assessment scores — quizzes, mock tests, GD/interview feedback
- Skill scorecard — a per-student dashboard covering communication, coding, aptitude, and project performance
- Certification issuance — auto-generated certificates upon meeting each year's completion criteria

Assessment & Certification Criteria (Year-wise)

Year	Assessment Basis	Certification Trigger
1	Attendance + JAM/extempore scores + UHV quiz	"Foundation & Personality Development" certificate
2	Coding test + aptitude test score + stream selection assessment	"Programming & Stream Readiness" certificate
3	Mock interview score + resume/profile audit + NQT-pattern test score	"Placement Readiness" certificate
4	Capstone project evaluation + hackathon/demo score + internship performance	"Industry Readiness" certificate + PPO eligibility tag

A minimum passing threshold per year (for example, 60%) is recommended so that students do not move into placement-preparation stages under-prepared.

10. Benefits to Students

- A progressive, four-year skill-building journey rather than a single, isolated training event
- Personality, communication, and confidence foundations built early, before technical pressure begins
- An informed, counselled choice of technical specialisation rather than a guess
- Company-specific exam and interview preparation aligned to real recruitment patterns
- A deployable capstone project and portfolio by graduation
- A genuine, structured pathway to an internship and Pre-Placement Offer
- Verifiable, year-wise certification tracked through an LMS

11. Benefits to Aditya College of Engineering

- A single, coordinated training partner across all four years and all branches, rather than fragmented one-off sessions
- Measurable, LMS-tracked improvement in student readiness — useful for NAAC/NBA documentation
- Stronger placement outcomes through a structured internship/PPO pipeline
- Reduced coordination overhead — one rotational schedule spanning odd and even semesters instead of ad hoc arrangements
- Faculty exposure to industry practitioners through guest sessions and mentor interactions
- A stronger institutional reputation for placement outcomes and industry engagement

12. Roles & Responsibilities

LARE IT Cloud Solutions Will:

- Design and deliver the year-wise curriculum described in Sections 4–7
- Maintain the LMS tracking, assessment, and certification mechanism described in Section 9
- Provide qualified trainers and industry mentors for each branch-wise rotation
- Coordinate the internship/PPO pipeline with Lare Consulting and Technologies Pvt. Ltd.
- Share periodic progress and skill-scorecard reports with the Institution

Aditya College of Engineering Will:

- Provide the rotational schedule slots per branch, per semester, in line with the academic calendar
- Designate a single point of coordination for the programme
- Facilitate student enrolment and communicate programme requirements to students and faculty
- Support venue, infrastructure, and student attendance tracking in coordination with the LMS

Joint Responsibilities

- Annual review of the programme structure, content, and outcomes
- Joint finalisation of eligibility criteria and benchmarks for the internship/PPO pipeline ahead of each Year 4 cohort

13. Commercial Terms

Programme Fee

The 4-Year Structured Training & Placement Programme is offered on a per-student, per-academic-year fee basis of ₹1,750, payable at the start of each of the four one-year sections (Year 1, Year 2, Year 3, and Year 4) in which a student is enrolled.

Section	Fee per Student
Year 1 — Foundation & Personality Building	₹1,750
Year 2 — Technical Foundation & Stream Discovery	₹1,750
Year 3 — Placement Readiness & Stream Specialisation	₹1,750
Year 4 — Industry Readiness & Capstone Projects	₹1,750

This fee applies uniformly per student, per year, regardless of branch, subject to a minimum cohort size to be mutually agreed. Any variation for a specific branch or batch shall be confirmed in writing prior to commencement of that year.

Where a student who has completed this programme also enrolls in the Short-Term or Long-Term Internship Programme offered separately by LARE IT Cloud Solutions, any applicable fee adjustment will be agreed between the Parties at that time.

14. Implementation Roadmap & Governance

Step	Activity
1	MoU discussion, finalisation, and signing
2	Joint finalisation of the rotational schedule against the academic calendar
3	LMS setup and student onboarding, branch-wise
4	Year 1 modules delivered across all branches
5	Annual progression through Years 2–4 per the structure in Sections 5–7
6	Year 4 internship/PPO pipeline activation with Lare Consulting and Technologies Pvt. Ltd.
7	Annual review meeting and renewal discussion

Governance & Review Mechanism

- A designated coordinator from each side for day-to-day communication
- A review meeting at the start and conclusion of each academic year
- A consolidated year-wise outcome report — attendance, assessment scores, and certification data — shared with the Institution

- An annual review of the overall partnership to discuss renewal, scope, and improvements

15. Memorandum of Understanding

This Memorandum of Understanding ("MoU") is entered into on this ____ day of _____, 2026, at Madanapalle, Andhra Pradesh, by and between:

LARE IT Cloud Solutions, represented jointly by (i) Mr. Sameer Shaik, Director of AI Strategy & Technology, and (ii) Mr. Babu Kottacheruvu, Director – Software Engineering, Operations & Business Development (hereinafter referred to as the "Industry Partner", which expression shall, unless repugnant to the context, include its group entities, successors and permitted assigns, including its placement partner Lare Consulting and Technologies Pvt. Ltd. where applicable), of the FIRST PART;

AND

Aditya College of Engineering, Valasapalle (P.O.), Madanapalle – 517325, represented by Dr. S. Ramalinga Reddy, Ph.D., D.Sc., M.I.S.T.E., M.I.E., Director (hereinafter referred to as the "Institution", which expression shall, unless repugnant to the context, include its successors), of the SECOND PART.

The Industry Partner and the Institution are hereinafter individually referred to as a "Party" and collectively as the "Parties".

1. Purpose

The purpose of this MoU is to establish a collaborative framework under which the Industry Partner will deliver a 4-Year Structured Training & Placement Programme, spanning all branches and academic years, to students of the Institution, as described in Sections 1–14 of the accompanying proposal, which forms an integral part of this MoU by reference.

2. Scope of Collaboration

This MoU covers the design and delivery of the year-wise curriculum, branch-wise rotational scheduling, LMS-based tracking and certification, and the internship/PPO placement pipeline described in the accompanying proposal. This MoU is independent of, and may be executed with or without, any separate internship-specific MoU between the Parties.

3. Definitions

- "Programme" means the 4-Year Structured Training & Placement Programme described in this document.
- "Cohort" means a defined group of students of a given branch and academic year undertaking the Programme together.
- "Placement Partner" means Lare Consulting and Technologies Pvt. Ltd., the entity through which the Year 4 internship/PPO pipeline referred to in Section 8 is administered.

4. Responsibilities of the Industry Partner

- Design and deliver the year-wise curriculum described in Sections 4–7 of the accompanying proposal.
- Operate the LMS tracking, assessment, and certification mechanism described in Section 9.
- Provide qualified trainers and industry mentors for each branch-wise rotation.

- Coordinate the Year 4 internship/PPO pipeline with the Placement Partner, subject to the eligibility and conversion criteria agreed under Section 8.
- Share periodic progress and skill-scorecard reports with the Institution.
- Maintain professional conduct and a safe, respectful learning environment for all students throughout the Programme.

5. Responsibilities of the Institution

- Provide the rotational schedule slots per branch, per semester, in line with the academic calendar.
- Designate a single point of coordination for the Programme.
- Facilitate student enrolment and communicate Programme requirements to students and faculty.
- Support venue, infrastructure, and attendance tracking in coordination with the LMS.
- Recognise year-wise certification issued under the Programme as evidence of the student's participation and performance.

6. Commercial Terms

The Programme Fee shall be ₹1,750 per student, per academic year, payable at the start of each of the four one-year sections of the Programme (Year 1 through Year 4), as set out in Section 13 of the accompanying proposal. Payment terms, invoicing, and any branch-wise or batch-wise variation shall be agreed in writing prior to the commencement of each academic year.

7. Intellectual Property

Training materials, curriculum, LMS content, and proprietary methodologies developed by the Industry Partner remain the exclusive property of the Industry Partner. Capstone and other student project work shall be credited to the student for academic and portfolio purposes, subject to the same principles set out in any separate internship-specific MoU between the Parties where a Year 4 project is undertaken as part of the internship/PPO pipeline.

8. Confidentiality

Each Party agrees to keep confidential any proprietary, commercial, or student data shared by the other Party in the course of this collaboration, and not to disclose such information to any third party without the prior written consent of the disclosing Party, except where disclosure is required by law or by a competent regulatory or academic authority.

9. Data Protection & Student Welfare

The Industry Partner shall handle any student personal data collected through the LMS or otherwise during the Programme solely for purposes connected with the Programme, and shall take reasonable measures to protect such data. The Institution and the Industry Partner shall jointly ensure a safe and non-discriminatory environment for all participating students across all four years.

10. Term & Renewal

This MoU shall be effective from the date of signing and shall remain valid for a period of four (4) academic years, coinciding with one full student cohort's journey through the Programme, unless terminated earlier under Section 11. This MoU may be renewed for successive terms by mutual written consent of both Parties.

11. Termination

Either Party may terminate this MoU by providing ninety (90) days' prior written notice to the other Party, given the multi-year nature of the Programme. In the event of termination, both Parties shall cooperate in good faith to ensure that any Cohort already admitted to the Programme is either completed or transitioned in a manner that does not disadvantage enrolled students.

12. Dispute Resolution

Any dispute, difference, or claim arising out of or in connection with this MoU shall first be resolved through good-faith discussion between the designated coordinators of both Parties. If unresolved within thirty (30) days, the matter shall be referred to the respective heads of the Institution and the Industry Partner for resolution, and thereafter, if necessary, through mediation prior to any recourse to legal proceedings, which shall be subject to the jurisdiction of the courts at Madanapalle, Andhra Pradesh.

13. Force Majeure

Neither Party shall be held liable for any failure or delay in performance under this MoU arising from causes beyond its reasonable control, including but not limited to natural disasters, pandemics, government restrictions, or other events of force majeure. The affected Party shall promptly notify the other Party and both Parties shall work together to minimise disruption to the Programme.

14. Governing Law

This MoU shall be governed by and construed in accordance with the laws of India.

15. Review Meetings & Amendments

The Parties shall conduct annual review meetings as described in Section 14 of this proposal. Any amendment to this MoU shall be valid only if made in writing and signed by authorised representatives of both Parties.

16. Entire Agreement

This MoU, together with the accompanying proposal (Sections 1–14), constitutes the entire understanding between the Parties with respect to its subject matter and supersedes all prior discussions, negotiations, and correspondence relating thereto. For the avoidance of doubt, this MoU is separate from, and does not modify, any independent Short-Term or Long-Term Internship MoU that may exist between the Parties.

IN WITNESS WHEREOF, the Parties hereto have set their hands on the date first written above.

Annexures

Annexure A — Year-wise Curriculum Handbook

A detailed, module-wise curriculum for each year (Years 1–4) and each branch-specific track will be shared separately as a curriculum handbook prior to the commencement of the first academic year, and updated periodically to reflect current industry practice and recruitment patterns.

Annexure B — LMS Scorecard & Certification Format

Sample formats of the LMS skill scorecard, attendance and module-completion tracker, and the four-year certification series (Foundation & Personality Development, Programming & Stream Readiness, Placement Readiness, Industry Readiness) will be shared for the Institution's review prior to Cohort 1 onboarding.

Annexure C — Internship/PPO Pipeline Terms

Detailed eligibility percentages, stipend structure, mentor-assignment process, and conversion benchmarks for the Year 4 internship/PPO pipeline with Lare Consulting and Technologies Pvt. Ltd. will be jointly finalised and recorded here prior to the first cohort entering Year 4.

Annexure D — Commercial Schedule

The Programme Fee is ₹1,750 per student, per academic year, as set out in Section 13 of the proposal and Section 6 of the MoU. Any branch-wise or batch-wise variation, along with the agreed payment schedule for each academic year, will be recorded here once finalised.
